¹ Open die body refers to the die having an open body style that you can see through the die

² Solid die body refers to the die having a solid metal backing with little holes or ejection foam for easy release

³ Cutting pads are available in numerous sizes - Standard, Extended, Extra Long 25", On the Edge and Decorative Strip.

⁴ The Metal Adaptor Plate can also be utilized in the Cuttlebug.

⁵ Bigz Pro dies can only be used in a larger rolling machine such as the Big Shot Pro and will not work in most standard die cut machines.
